

### **Neles™ pneumatic cylinder actuators, series B1**

Neles double acting and spring return B1-series piston type quarter turn actuators are designed for use in both modulating control and on-off service. These actuators offer an extremely long cycle life and are well suited to operate almost any type of rotary valve.

Product

### **Jamesbury™ Quadra-Powr™ X series pneumatic actuator**

Jamesbury spring diaphragm QPX series quarter turn actuators are designed for use in both modulating control and on-off service. These actuators offer an exceptionally long cycle life and are well suited to operate almost any type of rotary valve. QPX actuator is designed for...

Product

### **Jamesbury™ Valv-Powr™ VPVL series pneumatic actuator**

Jamesbury Valv-Powr VPVL series pneumatic actuator for fast, efficient, and economical operation of rotary valves.

Product

### **Neles™ heavy duty scotch yoke actuator, series N1**

The Neles scotch yoke N1 series actuator is designed for use with quarter turn valves in both modulating control and on-off service. The N1 actuator's robust design ensures a long life in harsh environments due to unique features such as its internal tie-rod mechanism. This hea...

Product

### **Neles Easyflow™ rack and pinion actuator, series RNP**

Neles Easyflow RNP series double-opposed piston rack and pinion actuators combine the benefits of high cycle life, a rugged construction, and an extremely compact and symmetrical design with a unique range of features and options. They are specifically designed for fast...

Product

### **Neles™ pneumatic linear cylinder actuator, series VB**

Neles double acting and spring return VB series piston type linear actuators are designed for use in both modulating control and on-off service. These actuators offer an extremely long cycle life and are well suited to operate linear valves with medium to high thrust...

Product

### **Neles™ pneumatic linear cylinder actuator, series VC**

Neles double acting VC series piston type linear actuators are designed for use in both modulating control and on-off service. These actuators offer an extremely long cycle life and are well suited to operate linear valves with medium to high thrust requirements.

Product

### **Neles™ pneumatic linear diaphragm actuator, series VD**

Neles spring return VD series diaphragm type linear actuators are designed for use in both modulating control and on-off service. These actuators offer an extremely long cycle life and are well suited to operate linear valves with small to medium thrust requirements.

Product

### **Neles Easyflow™ actuators, series AC**

Neles Easyflow heavy duty AC series piston-barrel linear actuator combine the benefits of high cycle life, a rugged construction and an extremely compact with unique range of feature and option. Lifetime lubricated with Quad seals, ensuring low friction and a very long life....

Product

### **Neles Easyflow™ actuators, series SN**

Neles Easyflow SN series piston-barrel linear actuator combine the benefits of high cycle life, a rugged construction and an accordance with ISO 15552 & VDMA 24562 with unique range of feature and option. They are specially designed for fast operation of gate valve, globe...

Product

### **Neles Easyflow™ actuators, series CC**

Neles Easyflow heavy duty CC series piston-barrel linear actuator combine the benefits of high cycle life, a rugged construction and an extremely compact with unique range of feature and option. They are specially designed for fast operation of gate valve, globe valve, dampe...

Product

### **Neles Easyflow™ actuators, series SC**

Neles Easyflow SC series piston-barrel linear actuator combine the benefits of high cycle life, a rugged construction and an accordance with ISO 15552 & VDMA 24562 with unique range of feature and option. They are specially designed for fast operation of gate valve, globe...

Product

### **Valve automation excellence**

Valmet valve automation offering ranges from limit switches to reliable actuators and intelligent valve controllers with third generation diagnostics.

Product

### **Instrumentation panels, series SP**

Neles™ SP series instrumentation function panels introduces a range of most common process valve control functionalities. Typically these functionalities are related to valve operation times and failure modes. Function panels are engineered to be used with Neles...
